DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.

Prior art such as Matsunaga et al. teaches a microphone bias circuit for use within an integrated circuit having a microphone input, the microphone bias circuit comprises: a first integrated circuit; a first resistor operably coupled to the first IC.

However, Matsunaga et al. or other prior art of record fail to teach of the specific wherein having a first integrated circuit pin and a first resistor coupled to and a second IC pin operably coupled to receive analog signals from a microphone; and a supply voltage buffer operably coupled to produce a buffered supply voltage based on a impedance setting ,wherein at least one off-chip component couples the second IC pin to the first IC pin and wherein the supply voltage buffer provides the buffered supply voltage to second IC pin as a microphone bias voltage as recited in the independent claim 1.

Similarly, the independent claim 8 has been analyzed and allowed partly in view of the incorporated limitation as the allowed claim 1.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Disler Paul whose telephone number is 571-270-1187. The examiner can normally be reached on 7:30-5:00.
